## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a pharmaceutical dosage form of the compound of formula 1 or a prodrug thereof, classified in class 514, subclass 359.
- II. Claims 17-48, drawn to a method of treating abnormal cell growth comprising administering to a mammal a compound of formula 1 or a prodrug thereof, classified in class 514, subclass 359.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of treating abnormal cell growth (i.e. cancer) can be practiced with another VEGF inhibitor, such as the drug ZD1839 (Iressa) (See: Tortora G, et al. abstract and Fig. 1 on page 4157).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
